

Huann Almeida

Frontend Developer with a Business Background

João Pessoa/PB – Brazil • +55 (83) 99126-3772 | [99980-2317](https://wa.me/5583991263772) (WhatsApp)
huannvictor@gmail.com • www.huannalmeida.dev.br • [GitHub](#)

Professional Summary

Career shifter with over 7 years of experience in business and sales, currently working as a Front-End Developer focused on React and Angular. Solid knowledge in JavaScript, TypeScript, HTML, CSS, API integration, and UI development.

My academic background in Business Administration provides me with a strong product vision and strategic thinking. I've acted as a volunteer Tech Lead, guiding front-end teams, defining architecture, and building user interfaces. I'm looking for collaborative teams where I can grow as a Full Stack Developer and deliver high-value digital solutions.

Technical Projects (Portfolio)

FSW Donalds – [GitHub](#) | [Live](#)

Order management system built with Next.js, React, TypeScript, TailwindCSS. Simulates an online burger restaurant with cart, checkout, and responsive layout. Deployed on Vercel.

Discord Clone – [GitHub](#)

Real-time chat app built with React, Node.js, Express, WebSockets, and MongoDB. Includes user authentication, audio rooms, and chat channels.

Short Link – [GitHub](#)

URL shortener using Node.js, Express, and MongoDB. Tracks link clicks, dynamic routing, and database persistence.

Expert Notes – [GitHub](#) | [Live](#)

Voice-to-text note-taking app built with React, TailwindCSS, and Vite. Leverages browser APIs for speech recognition and has an elegant, user-friendly interface.

Tech Stack

ReactJS, Next.js, JavaScript, TypeScript, Node.js, Express, REST APIs, PostgreSQL, MongoDB, TailwindCSS, Shadcn/UI, Figma, Git, GitHub, React Native, Agile (Scrum/Kanban), UI/UX principles.

Professional Experience

Sales Assistant

Editora Construir | May 2018 – Present • João Pessoa, PB (Brazil)

- Data analysis and report generation to support sales and operational decision-making.
- Collaboration with sales team and stakeholders to optimize processes.
- Developed problem-solving and client communication skills — now applied to software development.
- Experience with internal business processes, strategic thinking, and product-focused mindset.

Tech Lead Front-end

Skill Labs | Jan 2024 – Jun 2024 (Remote)

- Led a front-end team using ReactJS and Shadcn/UI within JavaScript ecosystem.
- Defined architecture, reviewed code, and mentored junior developers.
- Took ownership of interface design in the absence of UX/UI professionals.
- Participated in planning meetings and team alignment sessions.

Front-End Developer (ReactJS)

Skill Labs | Aug 2023 – Jan 2024 (Remote)

- Built responsive UIs using ReactJS and TailwindCSS.
- Contributed to collaborative team sprints with Git and Agile tools.
- Focused on accessibility, performance, and user experience.

Front-End Developer (AngularJS)

Organize Soft | Dec 2022 – Feb 2023 (Remote)

- Contributed to code migration using AngularJS and PO-UI.
- Integrated with legacy backend systems (FiveWin).
- First hands-on experience in a real-world tech environment.

Education

Associate Degree in Systems Analysis and Development

Wyden | 2024 – 2026 (In Progress)

Focus on algorithms, software design, database, and full-stack web development.

Bachelor's Degree in Business Administration

UNIESP | 2010 – 2018 (Final thesis pending)

Emphasis on business processes, resource management, and strategic decision-making — foundation for my developer profile with a strong product-oriented approach.
