# HUANN ALMEIDA • Full Stack Developer

João Pessoa/PB • +55 (83) 99126-3772 | +55(83) 99980-2317 (WhatsApp) • huannvictor@gmail.com
Portfolio: **www.huannalmeida.dev.br** • **GitHub**

## Professional Summary

I've been working as a developer since 2020, solving problems with dedication and a focus on the JavaScript ecosystem—both front-end (React and Angular) and back-end (Node.js). Over the past year, I led a front-end development team, supporting new members and creating solutions from screen design—filling the gap left by the absence of a UX/UI professional—to actively listening to client needs and turning them into actionable goals. I see myself thriving in a goal-oriented team that values delivering real impact.

## Experience

**(05/2018 – Present) Commercial Assistant | Construir Educational Publisher** | João Pessoa/PB
Responsible for mapping the client portfolio and maintaining a book production forecasting system. This role helped me develop key skills such as organization, active listening, demand management, and teamwork—all of which I carry into my tech career.

**(01/2024 – 06/2024) Front-end Tech Lead | Skill Labs** | Remote
Led the front-end team in an Agile environment, developing UI components and mentoring new team members. Collaborated closely with clients and the product team, and took charge of UI design during the absence of a UX/UI professional, ensuring project continuity.

**(08/2023 – 01/2024) Front-end Developer (ReactJS) | Skill Labs** | Remote
Worked on responsive and accessible UI development using ReactJS, contributing technical ideas and tool choices. Collaborated with the UX/UI team and participated actively in stakeholder meetings, strengthening both technical skills and product perspective.

**(12/2022 – 02/2023) Front-end Developer (AngularJS) | Organize Soft** | remoto
First professional experience in software development. Contributed to code migration to AngularJS and integrated it with a Five-Win back-end system.

## Education

**(04/2024 – 10/2026) Systems Analysis and Development | Wyden** (In Progress)
Studies focused on algorithms, logic, data structures, requirements analysis, and modern web development technologies.

**Bachelor's in Business Administration | UNIESP |** Pending Final Thesis Defense
Curriculum emphasized management, organizational behavior, and business processes—providing a strategic foundation that enhances my role as a developer.

## Languages

**English – Advanced:** Fluent in conversation, reading, and text interpretation.
Courses completed at CCAA (2009) and Minds (2018).
